DETAILED ACTION

The papers filed on April 25,2002 and June 20,2002 have not been made part of the permanent records of the United States Patent and Trademark Office (Office) for this application (37 CFR 1.52(a)) because of damage from the United States Postal Service irradiation process. The above-identified papers, however, were not so damaged as to preclude the USPTO from making a legible copy of such papers. Therefore, the Office has made a copy of these papers, substituted them for the originals in the file, and stamped that copy:

If applicant wants to review the accuracy of the Office's copy of such papers, applicant may either inspect the application (37 CFR 1.14(d)) or may request a copy of the Office's records of such papers (i.e., a copy of the copy made by the Office) from the Office of Public Records for the fee specified in 37 CFR 1.19(b)(4). Please do **not** call the Technology Center's Customer Service Center to inquiry about the completeness or accuracy of Office's copy of the above-identified papers, as the Technology Center's Customer Service Center will **not** be able to provide this service.

If applicant does not consider the Office's copy of such papers to be accurate, applicant must provide a copy of the above-identified papers (except for any U.S. or foreign patent documents submitted with the above-identified papers) with a statement that such copy is a complete and accurate copy of the originally submitted documents. If applicant provides such a copy of the above-identified papers and statement within **THREE MONTHS** of the mail date of this Office action, the Office will add the original mailroom date and use the copy provided by applicant as the permanent Office record of the above-identified papers in place of the copy made by the Office. Otherwise, the Office's copy will be used as the permanent Office record of the above-identified papers (*i.e.*, the Office will use the copy of the above-identified papers made by the Office for examination and all other purposes). This three-month period is not extendable.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Art Unit: 1755

Claims 7 and 14 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claims 7 and 14, the phrases "Direct Black 51", "Direct Black 109", "Direct Blue 199", "Direct Red 9", "Direct Red 32" and "Acid Blue 185" are considered vague and indefinite since it is unclear as to what the specific formula is for both of these dyes.

The Examiner performed a Registry File search in the STN database and could not obtain the formulas for these "Direct Black 51", "Direct Black 109", "Direct Blue 199", "Direct Red 9", "Direct Red 32" and "Acid Blue 185" to overcome this rejection.

Applicant should note that the Examiner also performed a Registry File search in the STN database for the "Food Black 2", "Direct Black 19", "Direct Black 154", "Direct Blue 86", "Acid Yellow 23", "Acid Blue 9", "Acid Red 17", "Acid Red 52", "Acid Red 249" and "Reactive Red 180" and was able to obtain their formulas.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation

under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 1-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Breton et al (US Patent 5,833,744).

Breton et al teach an ink for thermal ink jet printing comprising water, a cosolvent and a surfactant (abstract and col. 4 lines 21-23). The colorant that may be present in the ink composition may be selected from any suitable dye or pigment including Food Black 2 and Acid Yellow 23 (col. 5 line 21+). The reference further teaches that the colorant is present the in amount from about 1 to about 10 percent by weight (col. 8 line 58-col. 9 line 10). Humectants may also be present in the ink composition, which includes diols in the amount from about 1 to 30 percent by weight (col. 10 lines 10-40). The reference discloses that additives such as buffering agents and pH controlling agents present in the amount up to about 10 percent by weight (col. 10 line 63- col. 11 line 8). Polymeric chemical additives such as polysaccharide may also be present in the ink composition in the amount of 0.001 to about 10 percent by weight (col. 11 lines 13-26). The reference remains silent to the molecular weight of the polysaccharide, however the claimed molecular weights are commonly known molecular weights for polysaccharides. The reference also discloses a printing method of the ink composition (col. 13 line 17+ and claim 21). Breton et al fails to specifically exemplify the use of polysaccharide as claimed by applicant. Therefore, it would have

illi Contaol Hamber: 10/004, 4

been obvious to one of ordinary skill in the art to use the polysaccharide as claimed by applicant as Breton et al also discloses the use of polysaccharide but shows no example incorporating them.

Conclusion

The remaining references listed on forms 892 and 1449 have been reviewed by the Examiner and are considered to be cumulative to or less material than the prior art references relied upon in the above rejections.
